Following the theme of the IRIS 2005 working conference which was 'Reaching out beyond Scandinavia,' the first issue of volume 19 of the SJIS features a special issue that introduces Australian IS research and relates it to the Scandinavian IS research tradition. Julie Fisher—together with Karl Kautz—has served as a special issue guest editor. Acting as guest editor involves a considerable amount of work. Indeed, over the last year, Julie has spent time in Denmark to get the project off the ground. We are grateful for her effort and happy to offer the result to our readers. Thank you very much Julie.
